How much office space does your team need?

Estimate workstations, floor area and an indicative rent range for your next Singapore office in under two minutes.

Start calculating ↓

[How it works →](#)

— HOW IT WORKS

Three steps to your estimate

01

Tell us about your team

Enter today's headcount and how much you expect to grow over the next three years.

02

Choose how you work

Select your work style, typical office attendance and how much your teams collaborate.

03

See your space and rent range

Get recommended workstations, an estimated net lettable area (NLA) and an indicative monthly rent range.

Estimate your space and rent range

Move the sliders and choose your options.
Every result recalculates instantly.

YOUR INPUTS

Sample defaults shown

Headcount today

150 people

10

1,000

Full-time employees and long-term contractors who will use the office.

Work style

Traditional

Hybrid

Agile

Hybrid: A mix of assigned and shared desks; people split time between office and home.

Average office attendance

60%

40%

100%

Typical share of your people in the office on an average day. Used for Hybrid and Agile; Traditional gives everyone a desk.

Collaboration intensity

Low

Medium

High

Medium: Regular team meetings and some workshops.

Expected growth over 3 years

20%

0%

50%

Net headcount growth you want the space to accommodate.

YOUR ESTIMATE

Updates live

Estimated net lettable area (NLA)

14,872 sq ft

$$\text{NLA} = \text{workstations} \times (\text{workpoint area} + \text{collaboration area}) \times 1.35$$

Indicative monthly rent

S\$134k – S\$193k

Planning headcount (incl. growth)

180 people

Recommended workstations

122

Desk ratio: 0.68 per person

Suggested meeting rooms

10

Space per person

83 sq ft per person

Indicative annual rent

S\$1.61M – S\$2.32M

Based on a sample rent band of S\$9.00–S\$13.00 psf per month (gross, excl. GST, fit-out and utilities).

BREAKDOWN

Where your space goes

How your estimated 14,872 sq ft of net lettable area splits across four types of space.

- ① Support and circulation are fixed at 15% and 20% of usable area in this model.

Source: CBRE Singapore sample model. Default inputs: 150 people · Hybrid · 60% attendance · Medium collaboration · 20% growth. Segments may not sum exactly to NLA due to rounding.

■ Workpoints	7,956 sq ft	53.5%
■ Meeting & collaboration	3,060 sq ft	20.6%
■ Support & amenities	1,652 sq ft	11.1%
■ Circulation	2,203 sq ft	14.8%

How we calculate this

A simple, transparent model. Constants and the rent band are sample values for template purposes.

The formula in five steps

1. Planning headcount = today's headcount $\times$ (1 + growth).
2. Workstations = planning headcount $\times$ desk ratio, where desk ratio = 1 – sharing factor $\times$ (1 – attendance).
3. Usable area = workstations $\times$ (workpoint area + collaboration area).
4. NLA = usable area $\times$ 1.35.
5. Monthly rent = NLA $\times$ rent band (S\$ psf per month); annual rent = monthly rent $\times$ 12.
