TIMELINE

11 months to move-in

The story

From three ageing offices to one workplace built around how people really work.

Challenge

Approach

Results

Three offices, one ageing footprint

The company's 1,150 Singapore employees were split across three offices in the CBD and city fringe, with leases expiring between September 2026 and March 2027. Hybrid working had pushed average desk utilisation down to 48%, yet teams struggled to find meeting space and cross-team collaboration was suffering.

- Three leases expiring within seven months of each other
- 48% average desk utilisation, but meeting rooms over 90% booked at peak times
- A global commitment to cut occupancy costs and operational carbon

RESULTS

Results in numbers

The outcomes, measured against the client's original brief.

22%

Less office space (124,000 to 96,700 sq ft)

S\$2.4M

Annual occupancy cost savings

14 weeks

Fit-out delivery, on time and 3% under budget

89%

Of employees rate the new workplace good or excellent

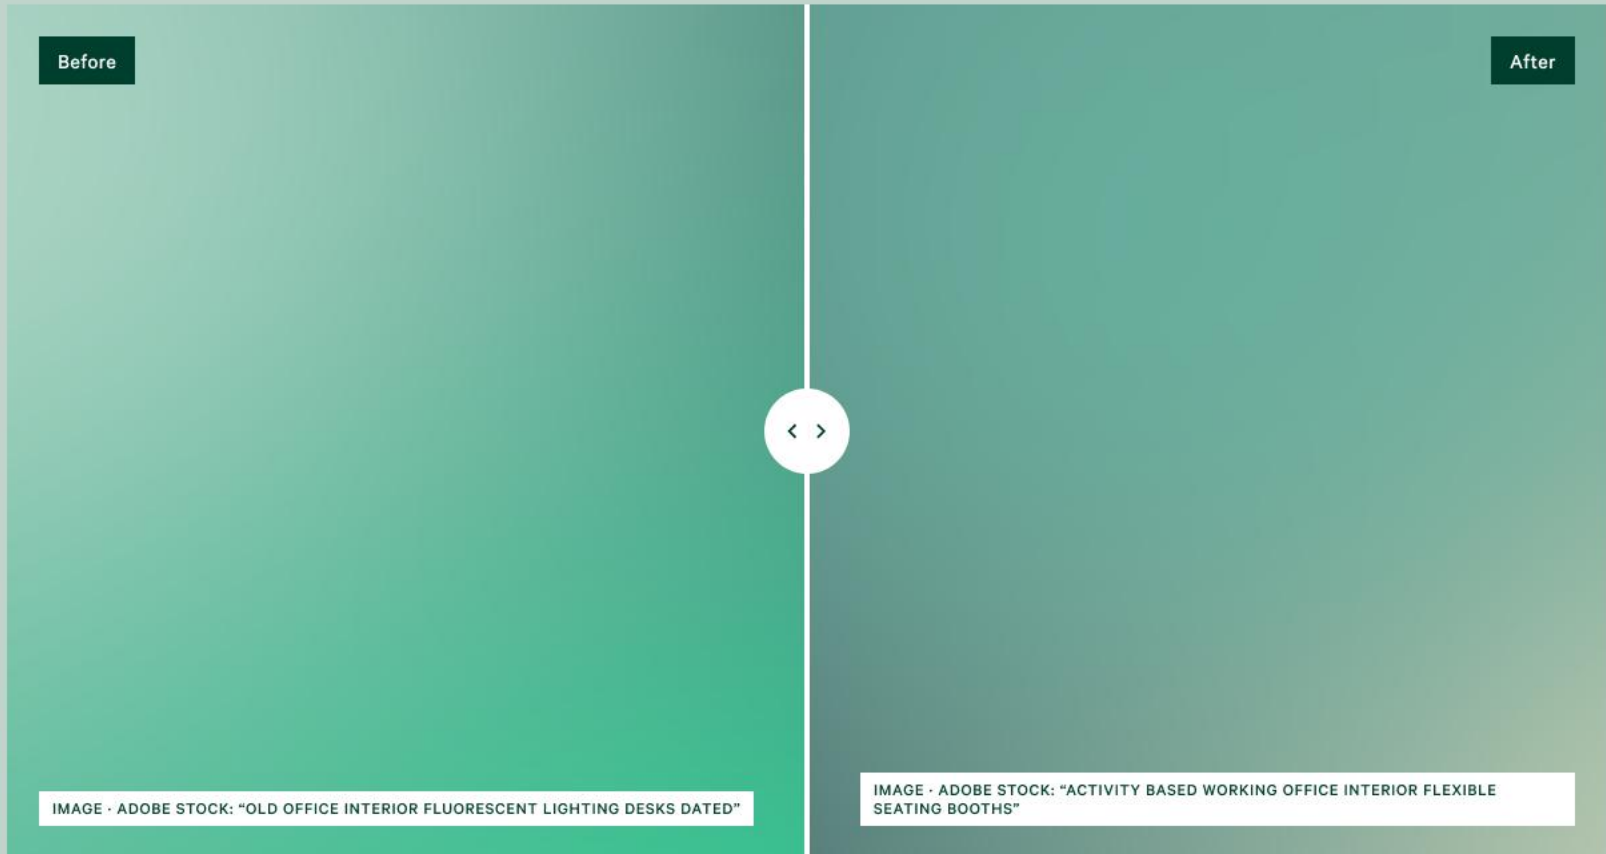

METHODOLOGY

Savings compare annual gross occupancy costs (rent, service charge, utilities and facilities services) of the three previous offices with the new headquarters' projected first full year. Satisfaction from a post-occupancy survey, September 2026 (612 responses). Sample figures.

— BEFORE & AFTER

The workplace, transformed

⛶ Drag the divider to compare.

BEFORE

Before: assigned desks in ageing offices, with too few places to meet.

AFTER

After: an activity-based floor with 12 types of work setting, from focus booths to project rooms.

From brief to move-in in 11 months

99

“CBRE gave us one team, one plan and one point of accountability. We brought 1,150 people together in a workplace they genuinely want to come to, without losing a single business day.”

The story

From three ageing offices to one workplace built around how people really work.

Challenge

Approach

Results

One integrated team, one plan

CBRE brought workplace strategy, tenant representation, project management, sustainability and facilities specialists together under a single account lead. A six-week utilisation study shaped the brief, the search and the design, so every decision traced back to how people actually worked.

- Occupancy sensors and a staff survey (780 responses) set a 0.7 desk-to-employee ratio
- A search of 14 options, ending in a six-year lease with a four-month rent-free fit-out period
- Design-and-build fit-out across four floors, plus reinstatement of the three vacated offices
